COLOURS

Our new colour palette brings to life who we are – warm, human, real, and approachable. Our colours express moods and emotions, setting the tone for each piece of communication.

Our cyan and white should be the predominant colours in most layouts. A high amount of white is always the base of the design (see colour ratio).

*) **KNAUF CYAN can't be represented in the existing RAL colour system 1:1.** It needs to be created by the production individually based on the Pantone value. Reference colours in other established colour systems for foils are:

- **Avery 900 Super Cast (New Generation):** Avery 942 Light Blue
- **ORACAL 951 Premium Cast**: 053 light blue
- **3M Scotchcal Series 100**: 100-123 Light Blue

In case a RAL colour is needed for colouring of elements which are not the logo (e.g. painting of buildings, metals or wood), please use **RAL 240 60 40**.

COLOUR RATIO

MAIN COLOURS

KNAUF CYAN

sRGB:	CMYK (PsoCoatedV3/FOGRA51L)	Pantone	RAL
0R 153G 222B // #0099de	100C 0M 0Y 0K	Process Cyan C // U	*)

NOTE: even though we provide the color in various shades, the required accessible color contrast ratio is guaranteed only at 100%.

Color Representation Notice
Please be aware that the colors shown in this PDF are only reliably represented on a calibrated wide-gamut monitor. While exact color reproduction may vary across devices and media, the relative relationships between RGB, cmyk, and spot colors are maintained. This enables an assessment of their visual characteristics across different applications, including screen display, spot color simulation, and print production.
